## REMARKS

The figures of births and deaths shown in this statement for week ending the 10th September, 1955 relate to 231 towns with an estimated population of 31,798 thousands. The total number of towns is 300 and their population is 38,988 thousands. Thus 77% of the total number of towns representing 82% of the total population is covered in this statement. The number of births and deaths recorded in these towns were 22,855 and 8,216 representing birth and death rates of 37·4 and 13·4 per thousand of population respectively.

(a) *States (Parts A and C)*.—The data here relate to 200 towns with an estimated population of 28,060 thousands. Information about Ajmer, and Madhya Pradesh could not be included. The total number of towns is 252 and their population is 32,572 thousands. Thus 79% of the total number of towns representing 86% of the total population is covered. The

number of births and deaths recorded in these towns were 20,665 and 7,441 representing birth rates and death rates of 38·3 and 13·8 per thousand of population respectively. The table at the end gives the position by States.

No town recorded a high death rate of 50 or over per thousand of population.

(b) *States (Part B)*.—The data here relate to 31 towns with an estimated population of 3,738 thousands. The total number of towns is 48 and their population is 6,416 thousands. Thus 65% of the total number of towns representing 58% of the total population is covered. The number of births and deaths recorded in these towns were 2,190 and 775 representing birth and death rates of 30·5 and 10·8 per thousand of population respectively.

No town recorded a high death rate of 50 or over per thousand of population.
